
Specific Kinetic Energy vs Total Mass of Accreted Gas
fit r^2 = 0.59
Total Mass ($M_\odot$)
Specific Kinetic Energy (energy/$M_\odot$)
Specific Gravitational Energy vs Total Mass of Accreted Gas
Total Mass ($M_\odot$)
Specific Gravitational Energy (energy/$M_\odot$)
Specific Internal Energy vs Total Mass of Accreted Gas
Total Mass ($M_\odot$)
Specific Internal Energy (energy/$M_\odot$)
Specific Magnetic Energy vs Total Mass of Accreted Gas
fit r^2 = 0.61
Total Mass ($M_\odot$)
Specific Magnetic Energy (energy/$M_\odot$)
